Oscar Lubricants in Brief

Oscar Lubricants was established in 1998 with the primary focus of manufacturing and marketing of specialty lubricants, hydraulic brake fluids and automotive radiator coolants.

In 2005 the company started production of automotive, industrial and marine lubricants.

In 2010 we operated the first extension by doubling the plant plot area and adding more blending capacity.

In 2015 we inaugurated the first State of the Art lube oil blending plant implementing the latest technologies and enjoying international standards.

Today, we are housed in 17,000 square meters including covered warehouses of 13,000 square meters and laboratory areas of 500 square meters with an accommodation facility for 100 employees.

Our primary location has easy access to various ports in the UAE, enabling us to ship goods on urgent basis to various countries in the region.

The strength of Oscar Lubricants is its dedicated personnel to service our customers/partners round the clock, financial stability, product inventory and prompt delivery.

The plant is based in Ajman, while the Company Head Quarters is located in Business Bay, Dubai, United Arab Emirates, Oscar Lubricants is an ISO 9001:2015 certified company.

Technological Research Center The most comprehensive in the Middle East

With more than forty sophisticated laboratory instruments and highly motivated and specialized personnel, Oscar Lubricants laboratories are one of the best and most comprehensive research centers of the Middle East, implementing ASTM and other reputed international standards to carry tests on both ingoing and outgoing products; from base oils, to lubricating oil additives, to lubricants.

In 2015 we incorporated the R&D Centre under the legal and separate entity: Kimya Testing Laboratories (KTL). The company is under ISO 17025 Laboratory Competence Accreditation Process.

Why we recommend Oscar Lubricants

The transport industry is vital to modern society. Lubricants contribute by prolonging the life of vehicles by cleaning, cooling and protecting their engines.

During the last two decades, we have experienced an increase of engine performance, operating temperatures, fuel efficiency and environmental awareness. At the same time, we witnessed a demand of reduction in particle emission, friction, fuel consumption and operating cost.

Oscar Lubricants faces the challenge by delivering outstanding protection and engine life durability with a permanent respect of the environment. Our product portfolio is well designed to cover the increasing demand of modern vehicles.

Oscar Lubricants has consistently improved the performance of its passenger car and heavy duty lubricants through the development of our own unique type of synthetic base oil technology combined with innovative additive packages. We created a full range of lubricants that meet and exceed API performance levels, fulfill dedicated OEM approvals and answer the customer's needs.

Our Vision

Oscar Lubricants aims to play a key role in the Middle East in the development of high quality oil lubricant products portfolio with an adherence and respect to the green economy of the United Arab Emirates and the environment through employee training and the application of social and professional ethics.

OSCAR Jade PRO

Oscar Jade Pro 0W20 is a very high performance, ultra-low viscosity Fluid, fully synthetic lubricant for gasoline and hybridengines, including the ones complying with ACEA C5 standard. Oscar Jade Pro 0W20 is formulated to helps to increase engine efficiency and improve fuel economy benefits, while providing outstanding overall engine protection.This product meets or exceeds the requirements of the latest ACEA industry specifications for petrol and hybrid engine oils, as well as the requirements of many major Europeans engine manufacturers. Suitable for use in passenger cars.

Specifications : ACEA C5; API SP and RC; API SN Plus and RC;ILSAC GF-6A & GF-5; BMW LL17FE+ (BMW LL14FE+ backward compatible); MB 229.71;VW 508.00/509.00; Porsche C20; RN17FE; Volvo VCC RBS0-2AE 0W-20; Opel Vauxhall OV0401547; Ford WSS-M2C947-B1; Ford WSS-M2C962-A1; Jaguar STJLR.03.5006-16; Jaguar STJLR.51.5122; Land Rover STJLR.51.5122; Fiat 9.55535-GSX; Chrysler MS-12145

OSCAR LABELLING EXPLAINED

API SP

API stands for American Petroleum institute, the body in charge of oil performance and quality standards in the US. Like the ACEA standards it includes specifications for both spark ('S') petrol engines and compression ('C') diesel engines. SN is the latest specification for petrol engines, introduced in 2010. Diesel classifications are more complex. The CJ4- specification, introduced in 2006, is designed for modern emission control and particulate filter systems.

PETROL

A
- **A1** Fuel economy petrol
- **A2** Standard performance level
- **A3** High performance and/or extended drain
- **A5** Fuel economy petrol with extended drain capability

DIESEL

B
- **B1** Fuel economy petrol
- **B2** Standard performance level
- **B3** High performance and/or extended drain
- **B4** Fuel economy petrol with extended drain capability
- **B5** Fuel economy petrol with extended drain capability

PETROL & DIESEL

C
- Diesel vehicles with diesel particular filter (DPF)
- **C1** Low SAPS (%0.5 ash) fuel efficient
- **C2** Mid SAPS (%0.8 ash) fuel efficient, performance
- **C3** Mid SAPS (%0.8 ash)

DIESEL

E
- Heavy - duty diesel
- **E1** Non-turbo charged light duty diesel
- **E2** Standard performance level
- **E3** High performance and extended drain
- **E5** High performance and extended drain including some API specs
- **E6** Euro 4 engines - low SAPS (sulphated ash, phosphorous, sulphur) for vehicles with DPF
- **E7** Euro 4 engines - exhaust after treatment / exhaust gas recirculation

ACEA C2/C3

The Association des Contructeurs Européens d'Automobiles is in charge of oil performance and quality standards in the EU. C2/C3 is a common oil specification for petrol and diesel engines. Here's the full list:

MANUFACTURES OEM CODES

Some manufactures quote OEM approval codes to help consumers buy oil of the right type and quality of their vehicle, notably German Makers BMW and VW. If your vehicle has an OEM approval code, look for it when you buy oils for example:

BMW LL04-
PSA B71 2132
VW501.01-505.00
RENAULT RN0700
FORD M2C917 - A
FIAT 9.55535 +S2

5W30

In order to protect the engine components when is car both hot and cold, engine oil has to meet viscosity specifications across a range of temperature. 'Viscosity' is the oil's 'pourability' or 'thickness'. This viscosity is measured and given an SAE 'grade'. Ordinary single-grade oil becomes so viscous (thick) at lower temperatures that it would take too long to reach movings parts in a cold engine and would not process easily through small gaps and oil ways. This is why all modern engine oils use VIs - Viscosity Enhancers - to improve thier viscosity at lower temperatures. These 'multigrade' oils get a regular viscosity test at 100 degrees Centigrade, and a second low-temperature 'winter' (W) test. Multigrade oils quote the 'W' (winter) figure first and the higher-temperature figure seconds. The lower the 'W' number the 'runnier' the oil is at low temperatures and the better the protection it offers. the higher the second figure, the thicker the oil is at high temperatures, which can be good for older engines

New engines are built with very fine manufacturing tolerances which demand a low-viscosity oil. These oils are often more expensive synthetic types.

Engine in older cars, or those with higher mileages, have lower operating tolerances and may benefit from a 'thicker' oil

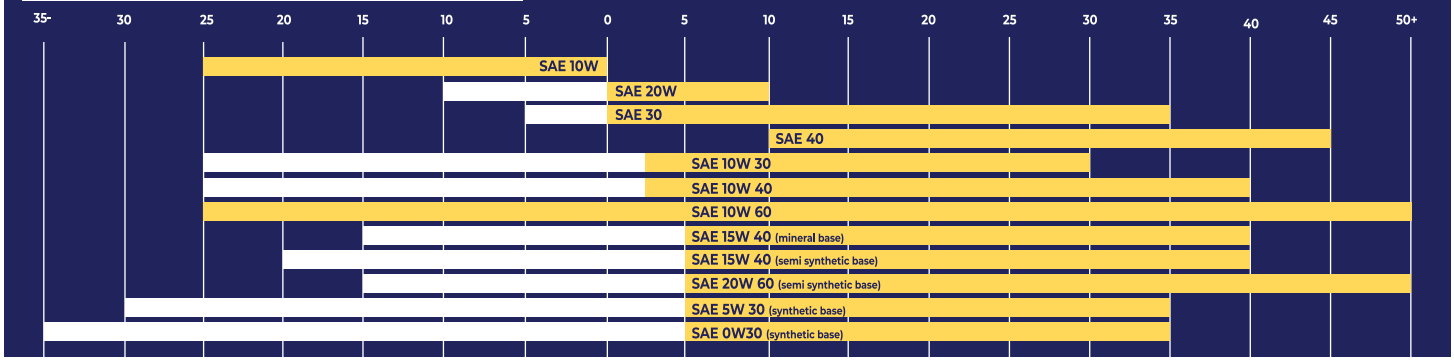

MINERAL

Mineral' oil sounds like it should be synthetic too (minerals aren't organic, after all), but the names comes from the way it's extracted from the earth like other mineral deposits. It's 'cruder' than synthetic oil, but also a lot cheaper to manufacturer, and it can still provide perfectly adequate protection for less demanding engines

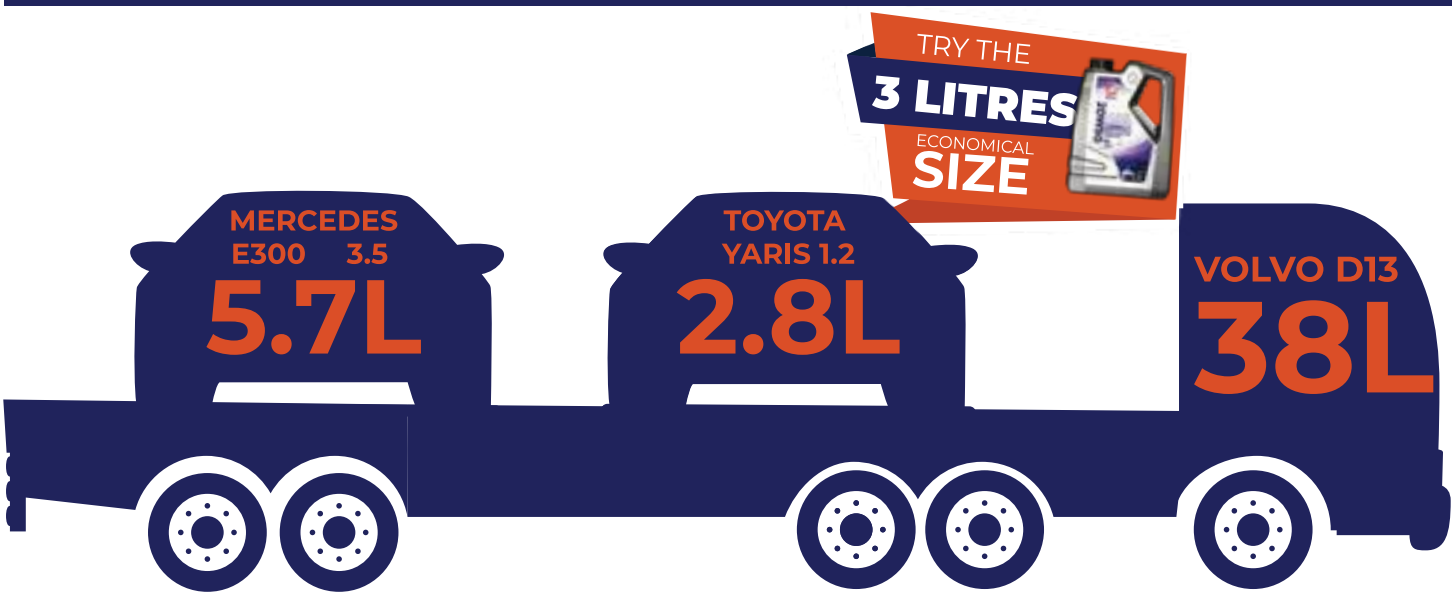

SYNTHETIC

Synthetic' motor oil is the pinnacle of engine lubricantion for high performance vehicles. Despite the name, though, synthetic oil is still derived from the thick black stuff ejected by oil wells. the difference is that its molecular structure and properties are modified, refined and 'synthesised' using complex laboratory

SAE GRADES ARE SOMETIMES RELATED TO OUTSIDE TEMPERATURE

DIRECT REPLACEMENT FOR YOUR CURRENT OIL

Oscar Zircon *NOVUS*

Oscar Zircon Novus CK-4 is an advanced fully synthetic heavy-duty diesel engine oil that helps extend engine life while providing long drain capability and potential fuel economy for modern diesel engines operating in severe applications. This product is formulated to deliver exceptional performance in modern and older hard-working engines. Oscar Zircon Novus is formulated to reduce pollutant emissions, such as HC, NOx, CO and particles and to protect and ensure longevity of post treatment anti-pollution systems, such as particulate filters (GPF, DPF) and three-way catalysts.

Oscar Zircon Novus CK-4 oils replace CJ-4 oils with the same viscosity grades and oil types (mineral / semi - synthetic / full-synthetic) and are backwards compatible down to CF-4 oils.

This product meets or exceeds the requirements of the latest API and ACEA industry specifcations for diesel engine oils, as well as the requirements of many major American, and European engine manufacturers.

Available in SAE viscosity grades : 5W30, 10W30, 10W40 and 15W40.

Specifications : API CK-4/SN, CJ-4/CI-4; ACEA E6-12, E7-12, E9-12; MB 228.51, 228.31; MAN M3477, M3677; MTU Type 3.1; VOLVO VDS-4.5, VDS-4; Mack EO-O Premium Plus; Renault Trucks RLD-3; Cummins CES 20081, 20086; Caterpillar ECF-3; DEUTZ DQC III-IV LA; DDC 93K218, 93K222

OSCAR ZIRCON *NOVUS FE*

Oscar Zircon Novus FA-4 is an advanced fully synthetic heavy-duty diesel engine oil. It is lower in viscosity grades to help maximize fuel economy without compromising durability for next generation engines. However, Oscar Zircon Novus FE FA-4 is limited in backwards compatibility. Designed to provide optimized fuel economy for 2017 engines and beyond that are designed to capitalize on these improvements.

This product meets or exceeds the requirements of the latest API and ACEA industry specifications for diesel engine oils, as well as the requirements of many major American, and European engine manufacturers.

Available in SAE viscosity grades : 5W30 and 10W30

Specifications : API FA-4 ; CES 20087 ; DDC 93K223

OSCAR Hydra XP

Industrial lubrication experts

Every industrial lubricant recommendation should be done after an expert consultation on the application in question. Only then the best lubricant can be selected. Oscar hydraulic oils series “HydraXP” are fitted to all your industrial applications

Oscar HydraXP series fitted to all your needs:

· HydraXP AW – high performance demulsifying AW/EP hydraulic and general lubricating oil

· HydraXP HLPD – high detergent HLPD/EP general lubricating and hydraulic oil with excellent corrosion protection

· HydraXP HVI – high performance emulsifying AW/EP hydraulic oil with a high Viscosity Index

• HydraXP AW – high performance demulsifying AW/EP hydraulic and general lubricating oil

DESCRIPTION

Oscar HydraXP AW series are general lubricating and hydraulic oils with good ageing resistance and additives to improve corrosion protection. Good viscosity temperature behavior, good wear protection, demulsifying, good air release, contain zinc.

APPLICATION

For all systems, even if thermally-stressed.

HYDRA XP

• HydraXP HLPD – high detergent HLPD/EP general lubricating and hydraulic oil with excellent corrosion protection

DESCRIPTION

Oscar HydraXP HLPD series are hydraulic fluids according to DIN 51 502 with outstanding corrosion protection, powerful cleaning and sludge transportation properties. Contain zinc as well as being detergent and dispersant. Used in a number of hydraulic systems as problem solvers, especially when standard oils cannot fulfil all the requirements.

APPLICATION

Oscar HydraXP HLPD 10: For machine tool spindles and bobbin bearings in the textile industry. Oscar HydraXP HLPD 22, 32, 68: Heavy-duty hydraulic oils with good corrosion protection up to continuous temperatures of 100 °C, for smaller gearboxes, especially when fitted with electromagnetic clutches. Oscar HydraXP HLPD 100: For larger gearboxes.

.

SPECIFICATIONS

Fulfil and surpass the minimum demands on HLPD hydraulic oils according to DIN 51 524-2. ISO 6743/4-HM with high DD performance.

• HydraXP HVI – high performance emulsifying AW/EP hydraulic oil with a high Viscosity Index

DESCRIPTION

Oscar HydraXP HVI series are hydraulic lubricating oils (machine oils) with a high Viscosity Index and additives to improve ageing resistance, corrosion protection and wear protection. Mineral oil-base and containing zinc.

APPLICATION

Suitable for all hydraulic systems, especially when a high viscosity index is specified or if excess viscosity during start-ups or insufficient viscosity at operating temperatures is a problem. High VI provides multi-grade characteristics.

OSCAR GEM XP

Industrial lubrication experts

Every industrial lubricant recommendation should be done after an expert consultation on the application in question. Only then the best lubricant can be selected. Oscar industrial gear oils series “GemXP” are fitted to all your industrial applications

Oscar GemXP series fitted to all your needs:

- GemXP GSH – demulsifying general lubricating, spin dle and hydraulic oil
- GemXP CLP – demulsifying high performance EP/AW gear oil and general lubricating oil
- GemXP CLPF – high performance EP/AW gear oil with MoS2 (black color)
- GemXP SYNTHETIC CLP – fully synthetic, high performance EP/AW gear oil based on polyalphaolefins (PAO)

- **GemXP GSH – demulsifying general lubricating, spindle and hydraulic oil**

DESCRIPTION

Oscar GemXP GSH series are spindle, hydraulic and general lubricating oils (machine oils) containing selected base oils and additives to improve ageing stability and corrosion protection.

APPLICATION

For thermally-stressed bearings and hydraulic systems with peak temperatures of approx 120 °C.

SPECIFICATIONS

All GemXP GSH products are DIN 51524-1 (HL) hydraulic oils and DIN 51517-2 (CL) general lubricating oils, based on mineral oils, demulsifying (water repellent) and free of zinc.

ISO 6743/4, HL, ISO 6743-6 and ISO 12925-1: CKB.

• GemXP CLP – demulsifying high performance EP/AW gear oil and general lubricating oil

DESCRIPTION

Oscar GemXP CLP series are high performance, gear oils and general lubricating oils with good ageing stability and additives to improve corrosion protection (combat ferrous and nonferrous metal corrosion caused by moisture). Outstanding anti-wear characteristics – good EP/AW performance, excellent protection against scuffing and micro pitting, excellent FE8 roller bearing wear protection, good demulsifying properties, very good foaming suppression, zinc- and silicone oil-free.

APPLICATION

Oscar GemXP CLP oils fulfil and surpass the minimum requirements of lubricating oils. Universal gear oils for all industrial applications such as in bearings, knuckles, spur, bevel and worm drives and whenever the manufacturer recommends a Type CLP oil.

SPECIFICATIONS

• GemXP CLPF – high performance EP/AW gear oil with MoS2 (black color)

DESCRIPTION

Oscar GemXP CLPF series are extreme pressure gearbox oils with synergetic chemical EP/AW additives and physical MoS2-based solid lubricants. The MoS2-based solid lubricants are physically effective and cover a wide range of temperatures in boundary friction conditions. They reduce friction and have a damping effect. Excellent wear protection in boundary friction conditions, good dirt suspension properties (detergent effect), low foaming, very good FE8 roller bearing wear protection as well as zinc- and silicone oil-free.

APPLICATION

For highly-stressed gearboxes operating at low speeds and high loads, even when subject to shock loading, for noise reduction and for the lubrication of spindles and gear-boxes in forging presses.

• GemXP SYNTHETIC CLP – fully synthetic, high performance EP/AW gear oil based on polyalphaolefins (PAO)

DESCRIPTION

Oscar GemXP Synthetic CLP series are fully-synthetic gear and general lubricating oils with excellent thermal and ageing stability, very high viscosity index (shear-stable), out-standing low temperature characteristics, good cold flowing properties, very good air release, low foaming, good protection against micro pitting, good FE8 performance, zinc and silicone oil-free.

APPLICATION

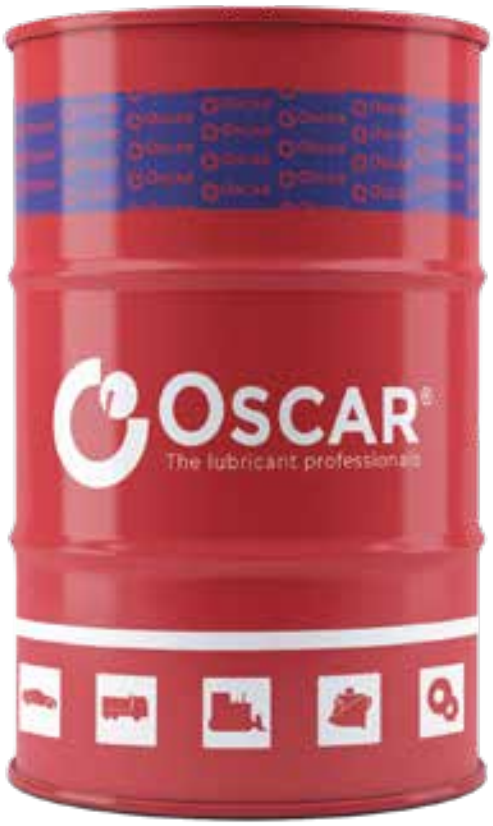

For the lubrication of bearings and gearboxes which are subject to high thermal loads. Suitable for lubricated-for-life applications and in gearboxes with extended drain intervals. Miscible and compatible with mineral oils. Excellent low temperature characteristics, high, shear-stable viscosity index.

TURBINE AND COMPRESSOR OIL

Oscar Lubricants can offer the best **Turbine and Compressor oil** for your specific application.

• Oscar Turbine Oil

DESCRIPTION
Oscar Turbine 32, 46 & 68

APPLICATION
Turbine oils for gas and steam turbines, also with gearboxes and as a control fluid for turbine plants and turbo-compressors.

SPECIFICATIONS
L-TD and L-TG turbine oils acc. to DIN 51 515-1 and -2

Product name	Density at 15 °C, kg/m3	Flash point Cleveland, °C	Kinematic viscosity at 40 °C, mm2/s	Kinematic viscosity at 100 °C, mm2/s	Viscosity index	Pour point, °C

OSCAR SOLUBLE CUTTING FLUID

Oscar Soluble Cutting Fluid has been formulated to meet the requirements for the preparation of water soluble oils which will give stable milky emulsions in all types of water.

It is using an additive which is a blend of emulsifying agents, wetting agents, and rust inhibitors, together with solvent refined mineral oils. It also contains biocides and fungicide additives to give the finished soluble oils and long service life, prevent emulsion breakdown and spoilage.

It is an extremely versatile product for medium-cutting operations, provides all the lubrication and cooling properties necessary to ensure good work piece finish, and extended tool life. It is suitable on ferrous and non-ferrous metals in turning, milling, drilling, tapping, threading and cold sawing operations.

Oscar Transfo U

DESCRIPTION

OSCAR TRANSFO® U Uninhibited Transformer oil is severely refined hydro-cracked / hydrotreated virgin mineral insulating oils with highest degree of purity and stability. OSCAR TRANSFO® oils are manufactured from judiciously selected blend of latest technology feed stocks.

OSCAR TRANSFO® U Uninhibited Transformer oil has superior oxidation stability – meeting the requirements as specified in IEC 60296:2012, high dielectric strength and are used in equipment requiring operations at high elevated temperatures & greater oxidation resistance.

CHARACTERISTICS

OSCAR TRANSFO® oils offer special advantages over 'conventional' transformer oils, such as:

- Very low Sulphur and no DBDS.
- Non corrosive as tested by all present and proposed methods, i.e. standard DIN tests and also new IEC 62535:08.
- Higher Flash point, resulting on Low evaporation losses and better safety
- Remarkably low sludge and acidity formation, in both ageing and
- oxidation tests, results in longer life of oil and equipment
- Low viscosity oils offering excellent and fast heat transfer

APPLICATIONS

OSCAR TRANSFO® oils are highly suitable for all grades of
- Power Transformers
- Distribution Transformers
- Circuit Breakers
- Oil filled switches
- X-ray equipment

QUALITY/APPROVALS

OSCAR TRANSFO® U Uninhibited oil conforms to and exceeds the requirements of IEC 60296:2012

STORAGE PRECAUTIONS

Extreme care is taken while packing these products, including filling of drums in inert atmosphere, as Electrical Insulating oils / Transformer oils are very sensitive to very minute concentrations of contaminants, such as moisture, particulate matter, fibers, etc. Hence, care should be taken to store OSCAR TRANSFO® oils in a clean and dry condition. It is strongly recommended that all storage tanks / drums be maintained such that oil is not in contact with atmospheric air. Also, oils should always be stored indoors in climate controlled environments

Oscar Heat Transfer Fluid IO 46

Oscar Heat Transfer Fluid IO 46 is a Synthetic based heat transfer fluid with inhibitors.

PROPERTIES

This lubricant assures:
- A good resistance to thermal cracking.
- An excellent resistance to oxidation in contact with the air thanks to special additives.
- An excellent thermal stability
- Low deposits · good ageing resistance

APPLICATIONS

- Heating in a liquid bath and all applications where air is present.
- Heating of domestic and industrial premises.
- Production of steam and hot water.
- Air conditioning.
- Keeping storage tanks at the requisite temperature.
- Heating by exchange systems (counter flow heat exchangers).
- Heating of thermal baths, autoclaves, reactors, furnaces, molding systems, drying tunnels and presses.
